

Hackathon “the study of the genetic susceptibility to COVID-19 and SARS-CoV-2 human host pathogen interactions”

September 01-09, 2020
 Institut Pasteur de Tunis (IPT)

September 01, 2020 (Computer Room, Research and Training Building)
Activity
Presentation of the projects to participants and relationship with recently accepted PRF related to COVID-19 Host Pathogen interactions
Logistics of the hackathon: Repositories, computational (bioinformatics lab or from home) and communication tools (slack) (Reporter maintenance README)
Repartitioning the participants into teams
Teams meetings and brainstorming

September 02, 2020 (Computer Room, Research and Training Building)
Activity
Small presentations of the outlines of each project established by the teams.
Hackathon hands on and coding sessions
Reporting of each project progressing (in english)

September 03, 2020 (Computer Room, Research and Training Building)
Activity
Hackathon hands on and coding sessions
Reporting of each project progressing (in english)

September 04, 2020 (Computer Room, Research and Training Building)	
Activity	
Hackathon hands on and coding sessions	
Reporting of each project progressing (in english)	

September 07, 2020 (Computer Room, Research and Training Building)	
Activity	
Hackathon hands on and coding sessions	
Reporting of each project progressing (in english)	

September 08, 2020 (Computer Room, Research and Training Building)	
Activity	
Hackathon hands on and coding sessions	
Reporting of each project progressing (in english)	

September 09, 2020 (Computer Room, Research and Training Building)	
Activity	
Demo sessions for each project	
Discussion for future activities and wrap-up of the hackathon	
Post hackathon activities and timeline
