

# PHINDaccess Fourth Newsletter (January 2022)

**Happy New year 2022!**  
The PHINDaccess team wishes you  
a year full of hope and new opportunities!

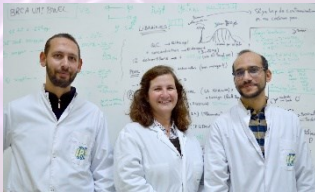

## 2022 Highway to Omics

### PHINDaccess expert visits: Enhancing IPT's capacity in NGS technology through strategic partnership with Biomics (IP, Paris)

From December 27-31, 2021, a team of experts composed of two members from the Biomics core facility at Institut Pasteur in Paris Ms. Laurence Ma and Dr. Imene Najjar, visited the technological facility at Institut Pasteur de Tunis as part of a strategic partnership within work package 4 (Task 1).

The goal of this first mission at Institut Pasteur of Tunis was to set the ground for transferring technological and scientific skills, pertaining to new generation sequencing (NGS) library preparation, quality controls and using the Illumina iSeq100 sequencing system.

### Seminar "Enhancing Fundraising and Grants Management capacities" January 26-27, 2022

During this event we shared experiences, methodologies and tools between PHINDaccess partners from Grants offices from Institut Pasteur de Tunis, Robert Koch Institute, Centre for Genomic Regulation and Institut Pasteur (Paris).

Good practices and guidelines on Grants offices management will be shared soon with all the scientific community.
